

Instructor-led Training by Dattell

Fundamentals for Elasticsearch

Objectives

- Foundational understanding of the ELK Stack, Architecture, Core Concepts, and Operations
- Review of best practices
- Tips on hardware selection
- Case studies
- Q&A

Logistics

- This is an instructor-led course, taught by one of our Elasticsearch Solution Architects
- The course is one-day (5 hours)
- This training is conducted remotely through video conferencing
- Attendees are not expected to have any prior Elasticsearch experience. Basic understanding of Linux OS and familiarity with a shell such as Bash is beneficial

Content

- Elasticsearch core concepts and fundamentals
- Common and niche use cases
- Architecting an Elasticsearch platform
- How to integrate Elasticsearch into your environment
- Introduction to real-time monitoring and hardware selection

Terms

Up to 10 team members can attend the training. The cost is \$2,400.
